Projects

Shopify Apps [↗](#)

2024 – present

- Built a "countdown page generator for Shopify stores", letting creators set up landing pages with one click.
- Helping creators manage hundreds of thousands of emails and streamline store campaigns.

monday.com apps [↗](#)

2024 – present

- Built an app for monday.com [↗](#) that lets users record and manage voice notes.
- Used by billion-dollar companies to improve teamwork and communication.

NFT Marketplace [↗](#)

2023 – 09/2023

- Built and sold a marketplace, designed for easy trading and ticketing with NFTs.
- Included features to make NFT buying and event access simple for users.

Achievements

Alchemy BKK Pool Hackerhouse Winner (2024) for Willi [↗](#)

Filecoin Winner (Summer 2022) for CreatorLabs [↗](#)

Skills

TypeScript

Nextjs

React Native

PostgreSQL

Cloudflare

Shopify, monday.com

I can remember entire movies

Professional Experience

full stack developer

Syntax Studios [↗](#)

06/2024 – present | Remote

- I am working on building high-performance applications, including creating Decision Markets and contributing to NFT marketplaces.
- Designing user-friendly features and backend systems to handle high traffic
- I am currently working with teams to create blockchain-based solutions for real-world use.

full stack developer

Pudgy Penguins [↗](#)

09/2022 – 03/2024 | Remote

- Worked on OverpassIP, a platform enabling NFT holders to license their digital assets to brands, bridging Web3 and traditional companies.
- Improved backend systems to support more users without downtime.
- Added features to make the platform easier for users and brands to use.

full stack developer

WhizCo [↗](#)

06/2022 – 06/2023 | Delhi

- Built a SaaS platform for brands and creators to connect and work together.
- Made tools to manage thousands of creators and brands without losing data.
- Automated boring tasks, saving time and making work easier for teams.
